### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

Applicant's election without traverse of group I, claims 1-12 in the reply filed on 08 April 2005 is acknowledged. Claims 1-12 are withdrawn from further consideration as being drawn to a nonelected invention. The requirement for election of species is withdrawn in the interest of compact prosecution.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 2834770.

The patent claim discloses a aqueous shellac composition comprising 40-80% water, 15-40% shellac and 2-12% (0.12-0.30 parts per part shellac) of a basic compound such as (tri)sodium phosphate.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 2834770, as applied above, in view of US Patent 5567438.

The reference discloses art recognized plasticizers useful for base-solubilized aqueous shellac solutions such as polyethylene glycol and triethyl citrate. It would have been obvious to one of ordinary skill in the art to add such compounds to the composition of

Art Unit: 1755

US Patent 2834770 because the '438 patent teaches they are known to lower the film formation temperature of shellac coating compositions.

Claims that further limit one member of a Markush group of a base claim, are yet anticipated by a reference that discloses a different member of that Markush group of the base claim.

Amendment of claim 1, to be limited to the aqueous coating agent comprising shellac and a basic amino acid would be allowable over the prior art of record.
